

## Welcome to the BrainReach North Newsletter!

We are a group of graduate students from the Integrated Program in Neuroscience at McGill University who volunteer to make online neuroscience lessons, activities, and resources to inspire the next generation of scientists to come. We put together this newsletter to share more about what we offer to you and your students.

## Seeds of Change Fundraising Campaign Result!

The annual Seeds of Change fundraising campaign took place this year again! Despite the difficult times with the pandemic, we raised over \$2000 from 49 donors! BrainReach North would like to

thank all the members of our community for such love and generosity, and McGill24 for matching the donation to double the support!

During the campaign, we made a little fun puzzle. Can you spot all 10 differences? Answer is at the bottom of the page.

## We are teaching online!

Since last year, BrainReach North volunteers have been giving virtual lessons. Many lessons are also getting updated for online teaching. If you are interested in having us lead a virtual discussion about the brain in your class, please send an email to [brainreachnorth@gmail.com](mailto:brainreachnorth@gmail.com)

## New Committee Members!

We have new committee members! Sabine Rannio will be the new co-president of BrainReach North. Hannah Owens will be in charge of social media communication. Ayuno Nakahashi will be writing the Newsletter.

Many thanks to Airi Watanabe for leading us as a co-president last year! She will continue to be part of the committee team. We are excited for the new fiscal year!

## Contact Us

Our mission is to provide fun, interactive, neuroscience-based learning materials for teachers and students in remote areas who wish to enrich their science program and teaching. We want to accomplish these goals with your help, send us an email at [brainreachnorth@gmail.com](mailto:brainreachnorth@gmail.com) for feedback, inquiries, and suggestions, or visit our website: <http://www.brainreachnorth.ca>
